

## CompML XD™

### Red Dot Reflex Sight

- A smaller and lighter red dot sight for handguns
- The Aimpoint® XD diode was introduced to the market in 1999 with improved diode brightness and battery life
- The XD diode aimed to meet the higher performance need among professional users interested in red dot sight as aiming device
- All sight models with the XD diode were covered by the at the time recently introduced longer warranty of 10 years

ITEM NO. 10151

## PRODUCT OVERVIEW

Since the pistol shooting and above all, the Practical shooting (IPSC) increased during 1993, a smaller and lighter sight intended for handguns, Aimpoint Comp, was developed.

After three years of testing and evaluation, U.S. Army accepted a ruggedised version of the Aimpoint Comp model, called CompM, and in 1997 a three year contract was signed with U.S. Army for 100 000 units. More and more armies showed interest in the new sight and to meet their demands on LED intensity and battery life the so-called XD diode was developed. The new diode increased the intensity by three times and the battery life by five times. At this time Aimpoint introduced its 10 years of warranty on all sights.

⊗ This product is no longer manufactured.

Service is still provided.

Launched: 1999 Discontinued: 2001

## TECHNICAL

# SPECIFICATIONS

### PHYSICAL SPECIFICATIONS

**Color Housing** Black

**Tube Diameter** 30 mm / 1.2 in

### OPTICAL SPECIFICATIONS

**Magnification** 1X - No Magnification

**Night Vision Device (NVD) Compatible** No

### POWER SOURCE SPECIFICATIONS

**Battery Type** 1/3N, 3V, Lithium

**Battery Quantity** 1

**Power Switch** Rotary Switch

### TECHNOLOGY SPECIFICATIONS

**Operating Principle** Reflex collimator sight - red dot sight
