- Professional grade red dot sight for use on land, air and at sea

ITEM NO. 10905

PRODUCT OVERVIEW

The Aimpoint® MPSII is the second generation of passive electronic reflex collimator sights suitable for medium or heavy support weapons.

MPSII was developed for military applications. It is intended primarily for use on vehicle mounted weapons. Its simplicity of use, based on the "One Function Principle" allows the user to concentrate on the target and operate the sight even with thick winter gloves. The Aimpoint MPSII is a non-magnifying sight with unlimited eye relief allowing an unequalled speed of target acquisition. The MPSII features manually adjustable reticle brightness for all light conditions. The revolutionary CET technology gives the Aimpoint MPSII an improved LED and an impressive battery lifetime of many thousands of hours of active use. Thanks to its NVD compatibility, the MPSII now offers the possibility to be used 24 hours a day. End User certificate required.
